A MEMBER OF ILPRA GROUP

Pioneering Cosmetic Packaging Automation

Advanced packaging solutions for the cosmetics
industry

Precision, innovation, and reliability in every fill

Our Vision

Build an ecosystem of trust and innovation, always guaranteeing quality and support.

Our Mission

Our mission is to provide innovative, high-quality solutions, ensuring long-lasting value and actively contributing to the success of our clients. We aim to exceed their expectations through continuous improvement of our products and services.

Our Fields of Expertise

IDM Automation is a trusted partner in the cosmetic industry, providing advanced packaging solutions across a diverse range of sectors. Our expertise ensures that every product is handled with precision and care, meeting the highest standards of quality and efficiency.

MAKE-UP

Innovative solutions for a wide array of cosmetic products, combining aesthetic appeal with precise functionality.

SKIN-CARE

Precision packaging for sensitive and high-value skin treatments, ensuring product integrity and hygiene.

HAIR-CARE

Versatile machinery for various hair product formulations, formulations, accommodating different viscosities and container types.

PERSONAL CARE & FRAGRANCE

Comprehensive systems for both everyday essentials and luxury scents, offering versatility and elegance.

Make-Up Sector Solutions

Precision & Creativity

The make-up industry demands packaging solutions that combine aesthetic appeal with precise functionality. IDM Automation provides advanced machinery designed to meet these intricate requirements.

Precise Filling

Ensures accurate dosing for consistent product quality

Versatile Capping

Handles various cap styles and container types

Flexible Changeover

Adapts quickly to different product lines

Key Products Served

- lipsticks
- powders
- nail polish
- mascara
- foundations

Skin-Care Packaging Excellence

The skin-care industry demands packaging solutions that prioritize hygiene, product integrity, and aesthetic appeal. IDM Automation offers advanced machinery designed to handle a wide range of skin-care formulations.

Precise Filling

Advanced systems ensure accurate dosing of delicate serums and potent formulations.

Gentle Handling

Machinery designed to preserve the efficacy of sensitive skin-care ingredients.

Airtight Sealing

Preserves the efficacy and shelf-life of every product with precise sealing.

Comprehensive Skin-Care Solutions

Serums

Lotions

Creams in jars

Creams in tubes

Hair-Care Innovation

Versatility & Precision for Hair Care

IDM Automation's machinery is engineered to meet the diverse demands of the hair-care industry, offering unparalleled versatility for a wide range of product viscosities and container types.

Product Versatility

Handles everything from thin liquids like hair serums to thick creams and gels with precision.

Container Adaptability

Adaptable to various bottle shapes, jars, and tubes, accommodating aesthetic requirements.

Production Efficiency

Maintains product integrity while ensuring efficient filling processes.

Innovation for Every Style

Our adaptability allows manufacturers to innovate with their product lines without compromising on production efficiency or quality.

Personal Care & Fragrance Solutions

IDM Automation provides comprehensive solutions for both the high-volume personal care market and the intricate, precise demands of fragrance packaging.

Personal Care

- ✓ Systems manage large-scale production with consistent quality
- ✓ Engineered for high-volume markets
- ✓ Ensures efficiency and product integrity

Fragrance

- ✓ Delicate and accurate filling to preserve product essence
- ✓ Solutions for intricate packaging needs
- ✓ Maintains product value and quality

"This dual capability highlights our commitment to versatility and elegance in packaging automation."

Our Machines: Structural Advantages

IDM Automation's machinery is engineered to deliver unparalleled performance and reliability in cosmetic packaging. Our commitment to innovation and quality is reflected in every aspect of our designs, offering significant benefits to our clients.

Modularity

Our systems are designed with a modular approach, allowing for easy customization, scalability, and integration of additional functionalities as production needs evolve.

Robust Stainless-Steel Construction

Utilizing high-grade stainless steel, our machines offer exceptional durability, corrosion resistance, and compliance with stringent hygiene standards required in cosmetic industries.

Compact Design

Engineered for efficiency, our machines feature a compact footprint, optimizing valuable production floor space and allowing for seamless integration into existing layouts.

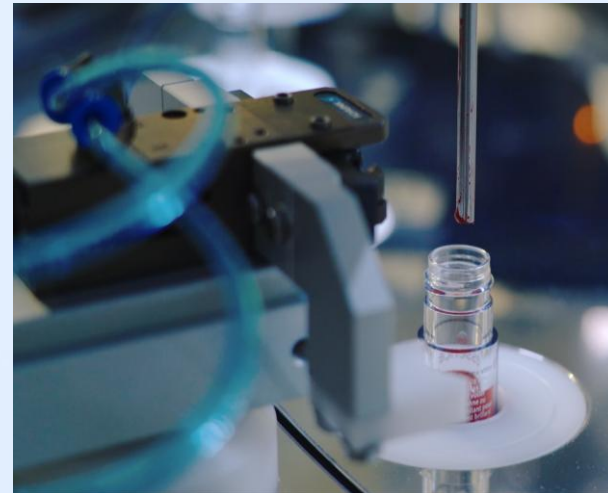

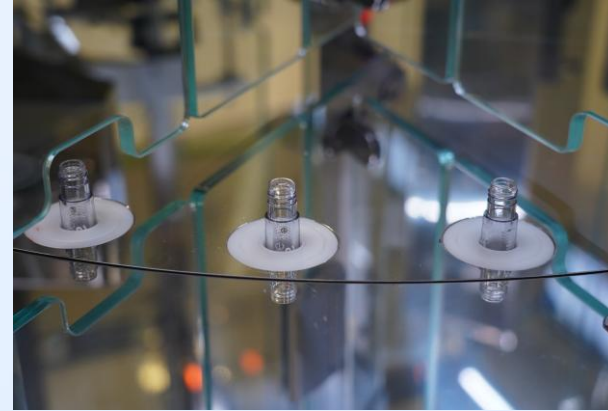

Ease of Cleaning

Designed with accessibility and hygiene in mind, our machines facilitate quick and thorough cleaning processes with smooth surfaces, minimal crevices, and easily removable parts.

Our Machines: Structural Advantages

IDM Automation's machinery delivers unparalleled performance for cosmetic packaging through modular design for flexibility, robust stainless-steel construction for durability and hygiene, and an easy-to-clean, compact footprint.

Our Machines: Key Strengths

IDM Automation's machinery excels in performance, offering advanced features that drive productivity and precision in cosmetic packaging.

High Productivity

Optimized performance for maximum output and minimal downtime.

Precision Engineering

Engineered for accuracy in dosing and handling.

Adaptability

Versatile operation for various product types.

Reliability

Consistent performance for extended operations.

Innovation

Continuous advancement in packaging technology.

Ease of Use

Intuitive operation for optimal workflow.

Scalable Automation Solutions

IDM Automation provides solutions for every scale. From fully integrated turnkey lines to individual, high-performance modules, we deliver the precise level of automation you need.

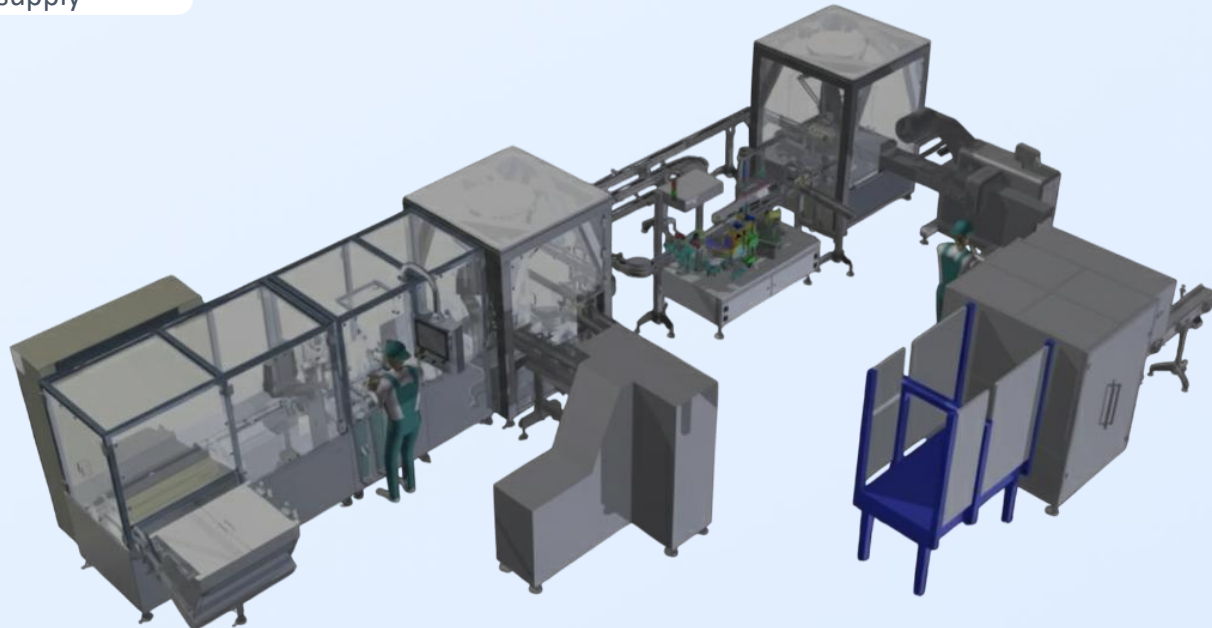

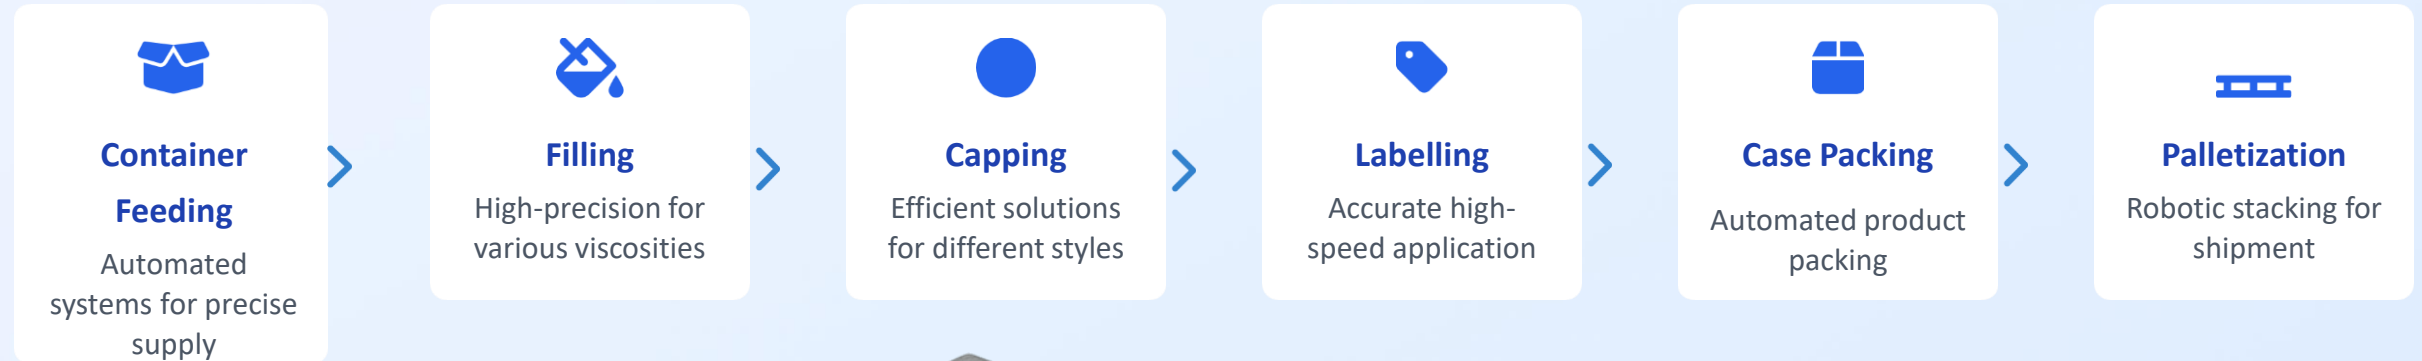

Single Automations & Components

No task is too small. We also design and supply individual automations, including robotic cells, custom conveyors, and peripheral modules.

Complete Turnkey Solutions

IDM Automation provides comprehensive solutions that extend beyond individual machines, offering complete integrated production lines from container feeding to palletization.

Key Benefits of IDM's Turnkey Approach

- ✓ **Streamlined Process**
Seamless operations from start to finish
- ✓ **Quality Assurance**
Consistent high standards maintained
- ✓ **Enhanced Productivity**
Optimized efficiency throughout production

Our Contacts

Let's Create Together

Partner with IDM Automation to bring your cosmetic packaging vision to life. We are dedicated to providing innovative and reliable solutions tailored to your specific needs.
