# IDM AUTOMATION

*Pioneering Cosmetic Packaging Automation*

Born in Vigevano in 2009, we are a manufacturer of machinery and automation technologies with high experience in the cosmetic manufacturing sector. We can offer a wide range of innovative solutions, cosmetic packaging machines, to meet the diverse needs of our partners. By joining the ILPRA family in 2023, we offer even more services.

Advanced packaging solutions for the cosmetic and food industry. Precision, innovation, and reliability in every fill.

# OUR FIELD OF EXPERTISE

## *Cosmetic industry*

IDM Automation is a trusted partner in the cosmetic industry, providing advanced packaging solutions across a diverse range of sectors. Our expertise ensures that every product is handled with precision and care, meeting the highest standards of quality and efficiency.

### MAKE UP

Innovative solutions for a wide array of cosmetic products, combining aesthetic appeal with precise functionality.

### SKIN CARE

Precision packaging for sensitive and high-value skin treatments, ensuring product integrity and hygiene.

### HAIR CARE

Versatile machinery for various hair product formulations, accommodating different viscosities and container types.

### PERSONAL CARE & FRAGRANCE

Comprehensive systems for both everyday essentials and luxury scents, offering versatility and elegance.

# OUR FIELD OF EXPERTISE

## *Food industry*

Testo sul food industry

### OUR FOOD EXPERIENCE

Our food experience

### CREAMS & JAMS

Precision packaging for your creams, marmalade, and similar products that are filled in glass or plastic jar.

### SAUCES

Versatile machinery for various sauces like mayonese, mustard accommodating different viscosities and container types.

### OIL VINEGAR & LIQUID

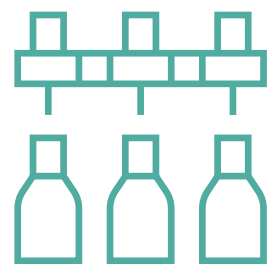

Comprehensive systems for both beverage and liquid products on plastic or glass bottles.

# MAKE-UP SECTOR SOLUTIONS

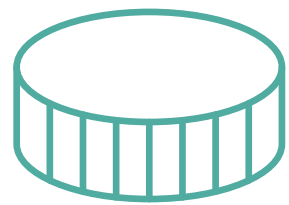

## *Precision & Creativity*

The make-up industry demands packaging solutions that combine aesthetic appeal with precise functionality. IDM Automation provides advanced machinery designed to meet these intricate requirements.

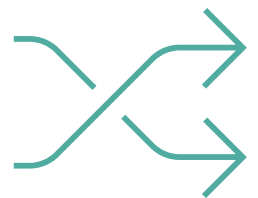

### Precise Filling

Ensures accurate dosing for consistent product quality

### Versatile Capping

Handles various cap styles and container types

### Flexible Changeover

Adapts quickly to different product lines

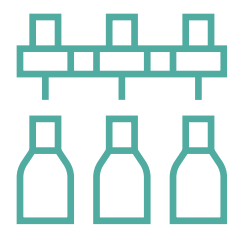

### Key Products Served

- Lipstick
- Powders
- Nail polish
- Mascara
- Foundations
- ---

# SKIN-CARE PACKAGING EXCELLENCE

## *Precision & Creativity*

The skin-care industry demands packaging solutions that prioritize hygiene, product integrity, and aesthetic appeal. IDM Automation offers advanced machinery designed to handle a wide range of skin-care formulations.

### Precise Filling

Advanced systems ensure accurate dosing of delicate serums and potent formulations.

### Gentle Handling

Machinery designed to preserve the efficacy of sensitive skin-care ingredients.

### Airtight Sealing

Preserves the efficacy and shelf-life of every product with precise sealing.

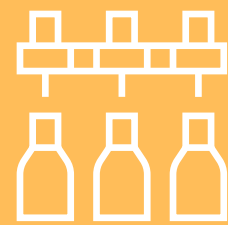

### Key Products Served

- Serums
- Lotions
- Creams in jars
- Creams in tubes
- ---
- ---

# CREAMS – MARMELADE AND SIMILAR

# HAIR-CARE INNOVATION

## *Versatility & Precision for Hair Care*

IDM Automation's machinery is engineered to meet the diverse demands of the hair-care industry, offering unparalleled versatility for a wide range of product viscosities and container types.

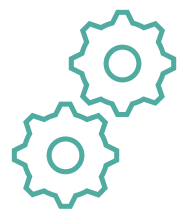

### Product Versatility

Handles everything from thin liquids like hair serums to thick creams and gels with precision.

### Container Adaptability

Adaptable to various bottle shapes, jars, and tubes, accommodating aesthetic requirements.

### Production Efficiency

Maintains product integrity while ensuring efficient filling processes.

### Innovation for Every Style

- Our adaptability allows manufacturers to innovate with their product lines without compromising on production efficiency or quality.

# SAUCES

## *Versatility & Precision for Any Sauces and similar*

IDM Automation's machinery is engineered to meet the diverse demands of the Food industry, offering unparalleled versatility for a wide range of product viscosities and container types.

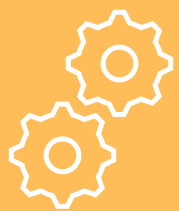

### **Product Versatility**

Handles everything from thin liquids like sauces creams and gels with precision.

### **Container Adaptability**

Adaptable to various bottle shapes, jars, and tubes, accommodating aesthetic requirements.

### **Production Efficiency**

Maintains product integrity while ensuring efficient filling processes.

### **Innovation for Every Style**

- Our adaptability allows manufacturers to innovate with their product lines without compromising on production efficiency or quality.

# PERSONAL CARE & FRAGRANCE

## *Versatility & Precision for Hair Care*

IDM Automation provides comprehensive solutions for both the high-volume personal care market and the intricate, precise demands of fragrance packaging.

"This dual capability highlights our commitment to versatility and elegance in packaging automation."

### Personal Care

- Systems manage large-scale production with consistent quality
- Engineered for high-volume markets
- Ensures efficiency and product integrity

### Fragrance Solutions

- Delicate and accurate filling to preserve product essence
- Solutions for intricate packaging needs
- Maintains product value and quality

# OIL VINEGAR AND LIQUID

## *Versatility & Precision for Hair Care*

IDM Automation provides comprehensive solutions for both the high-volume plastic or glass bottle filling

"This dual capability highlights our commitment to versatility and elegance in packaging automation."

### Liquid and Beverage

- Systems manage large-scale production with consistent quality
- Engineered for high-volume markets
- Ensures efficiency and product integrity

### Fragrance Solutions

- Delicate and accurate filling to preserve product essence
- Solutions for intricate packaging needs
- Maintains product value and quality

# OUR MACHINES

## *Structural Advantages*

IDM Automation's machinery is engineered to deliver unparalleled performance and reliability in cosmetic packaging. Our commitment to innovation and quality is reflected in every aspect of our designs, offering significant benefits to our clients.

### **MODULARITY**

The systems feature a modular design that enables easy customization, scalability, and integration of new functionalities as production requirements change.

### **STAINLESS STEEL CONSTRUCTION**

Our machines ensure durability, corrosion resistance, and full compliance with strict hygiene standards for the cosmetic and food industries.

### **COMPACT DESIGN**

Designed for efficiency, the machines have a compact footprint that optimizes production floor space and integrates easily into existing layouts.

### **EASE OF CLEANING**

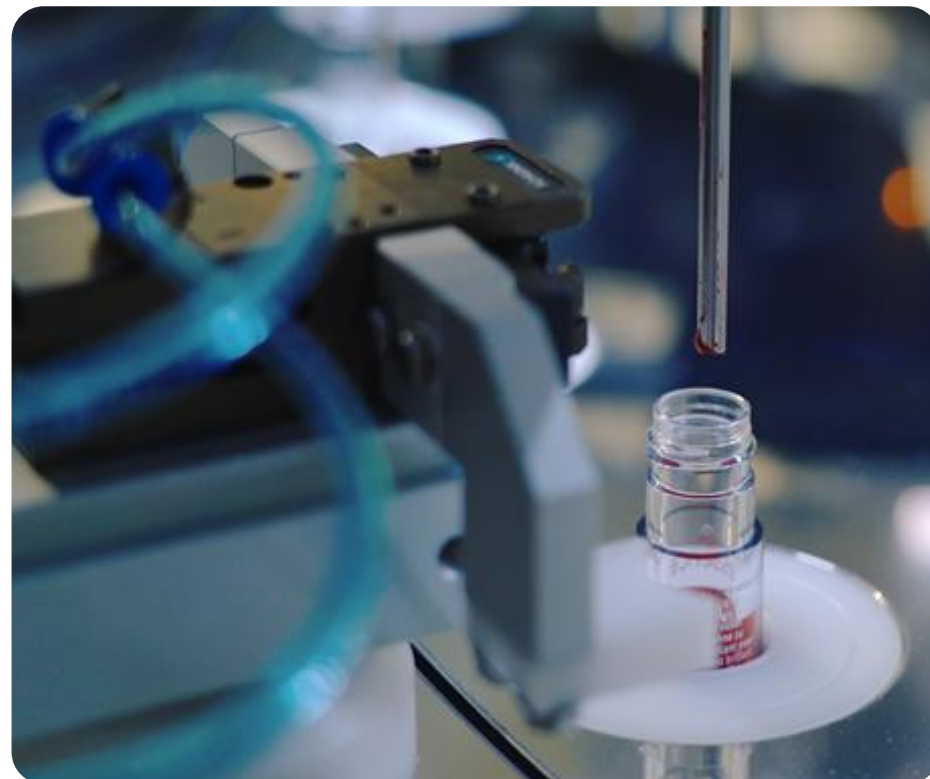

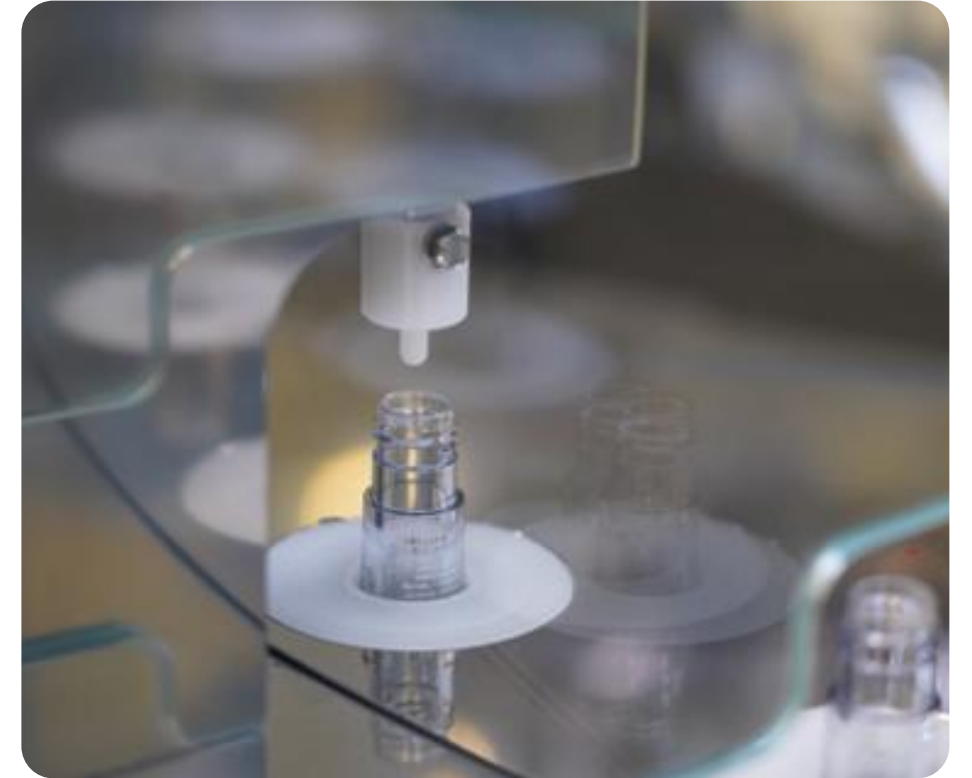

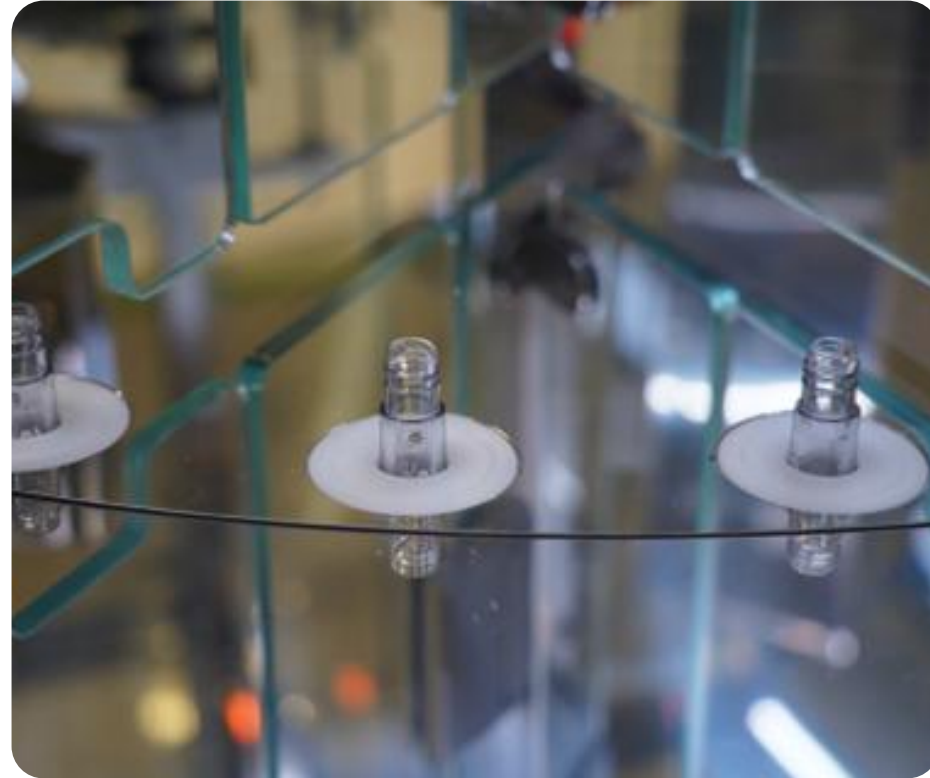

Designed for accessibility and hygiene: fast and effective cleaning thanks to smooth surfaces, minimal crevices, and easily removable components.

# OUR MACHINES

## *Structural Advantages*

IDM Automation's machinery delivers unparalleled performance for cosmetic packaging through modular design for flexibility, robust stainless-steel construction for durability and hygiene, and an easy-to-clean, compact footprint.

# OUR MACHINES

## *Key Strengths*

IDM Automation's machinery excels in performance, offering advanced features that drive productivity and precision in packaging.

### HIGH PRODUCTIVITY

Optimized performance for maximum output and minimal downtime.

### PRECISION ENGINEERING

Engineered for accuracy in dosing and handling.

### ADAPTABILITY

Versatile operation for various product types.

### RELIABILITY

Consistent performance for extended operations.

### INNOVATION

Continuous advancement in packaging technology.

### EASE OF USE

Intuitive operation for optimal workflow.

# SCALABLE AUTOMATION SOLUTIONS

## *Pioneering Cosmetic Packaging Automation*

IDM Automation provides solutions for every scale. From fully integrated turnkey lines to individual, high-performance modules, we deliver the precise level of automation you need.

### Single Automations & Components

- No task is too small. We also design and supply individual automations, including robotic cells, custom conveyors, and peripheral modules.

# COMPLETE TURNKEY SOLUTIONS

## *Key Strengths*

IDM Automation provides comprehensive solutions that extend beyond individual machines, offering complete integrated production lines from container feeding to palletization.

1

### CONTAINER FEEDING

Automated systems for precise supply

2

### FILLING

High-precision for various viscosities

3

### CAPPING

Efficient solutions for different styles

4

### LABELLING

Accurate high-speed application

5

### CASE PACKING

Automated product packing

6

### PALLETIZATION

Robotic stacking for shipment

# COMPLETE TURNKEY SOLUTIONS

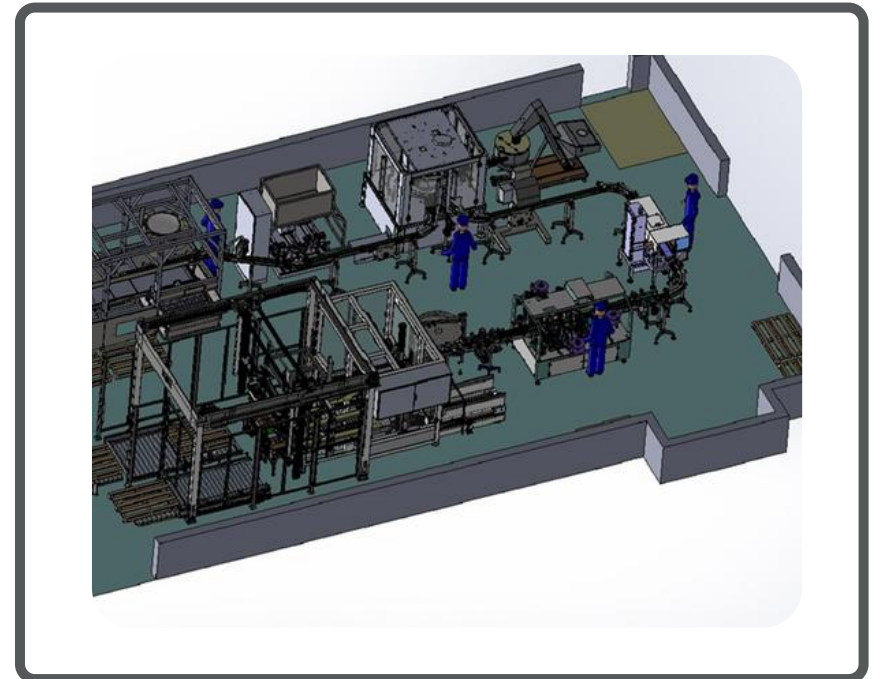

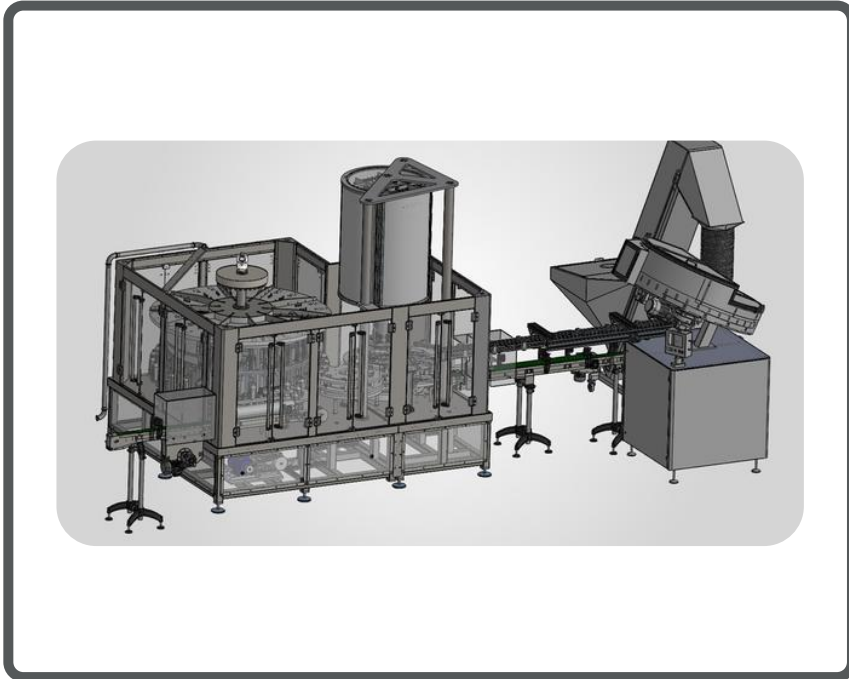

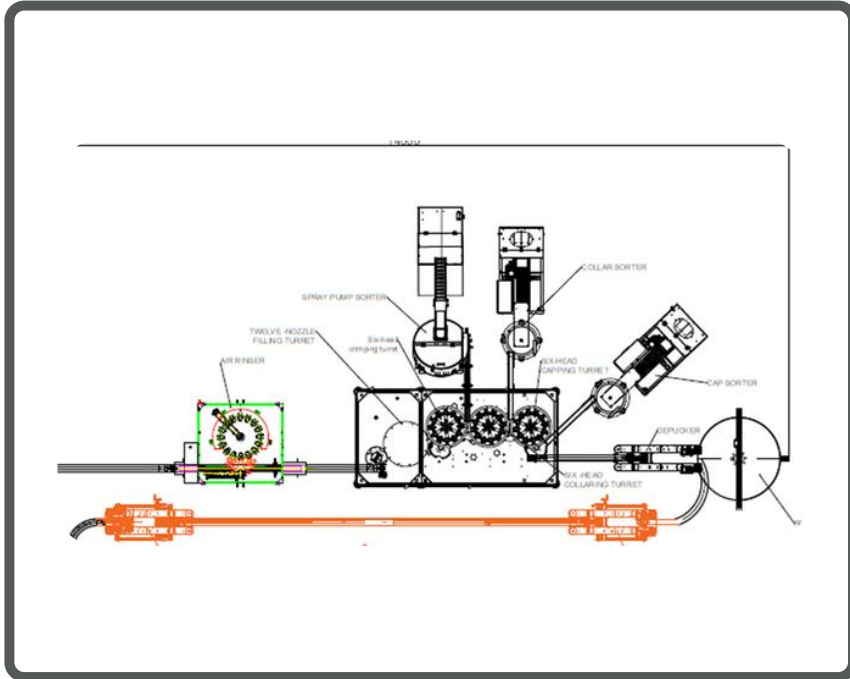

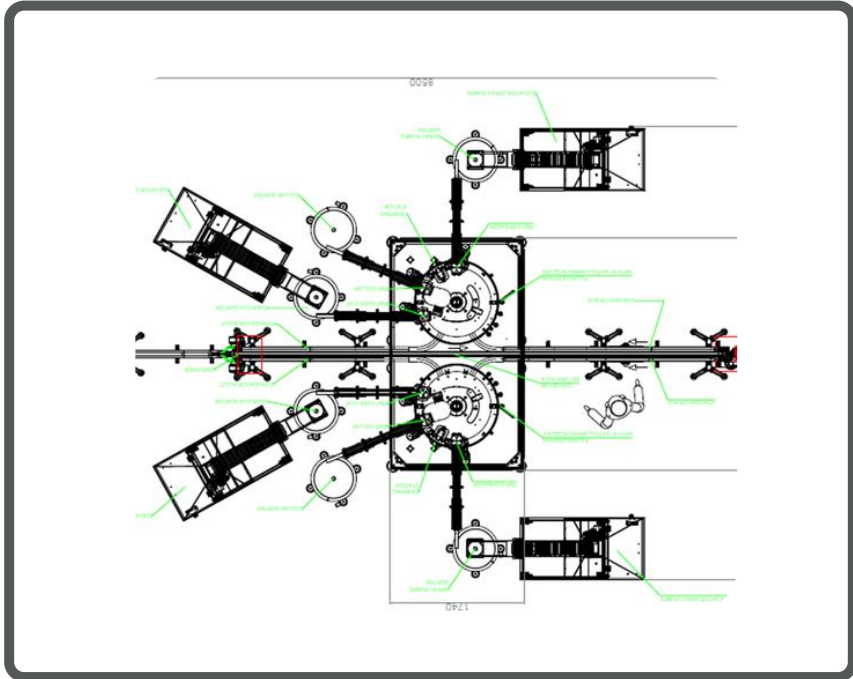

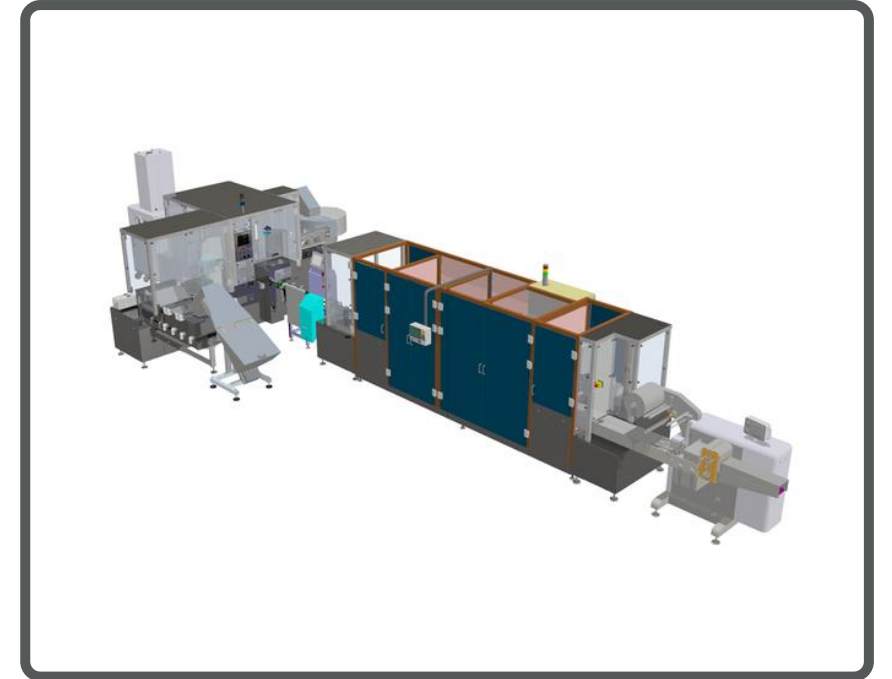

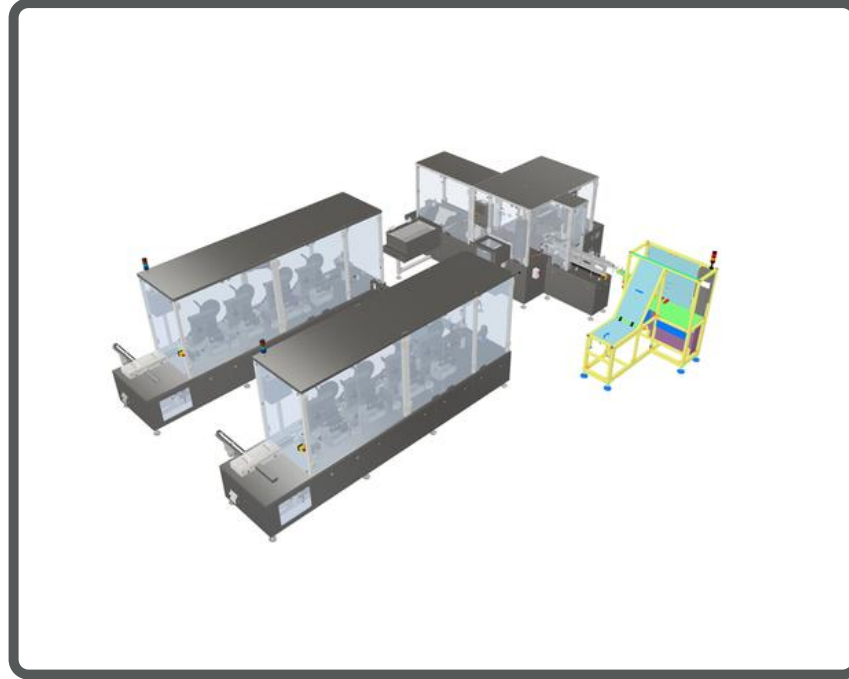

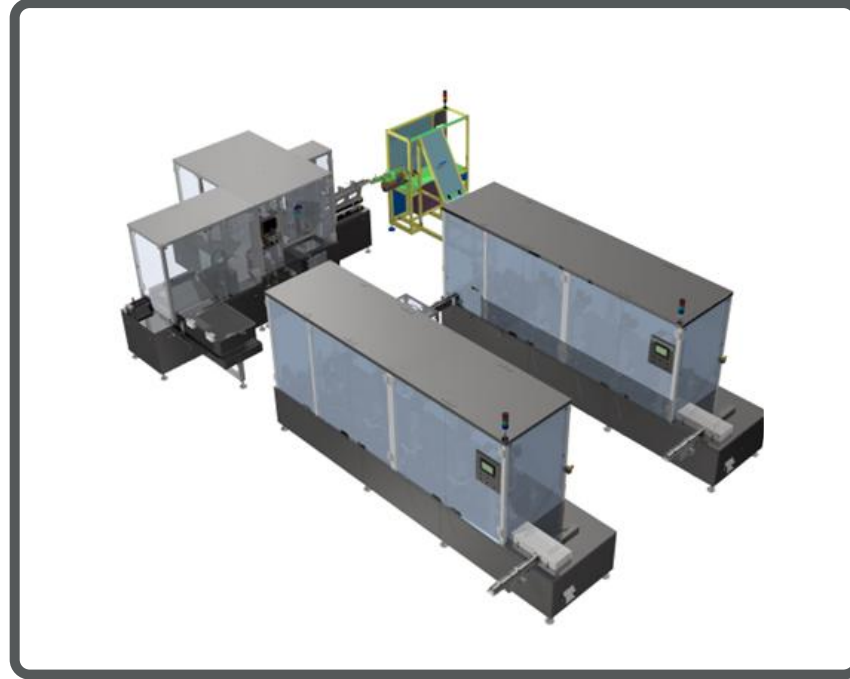

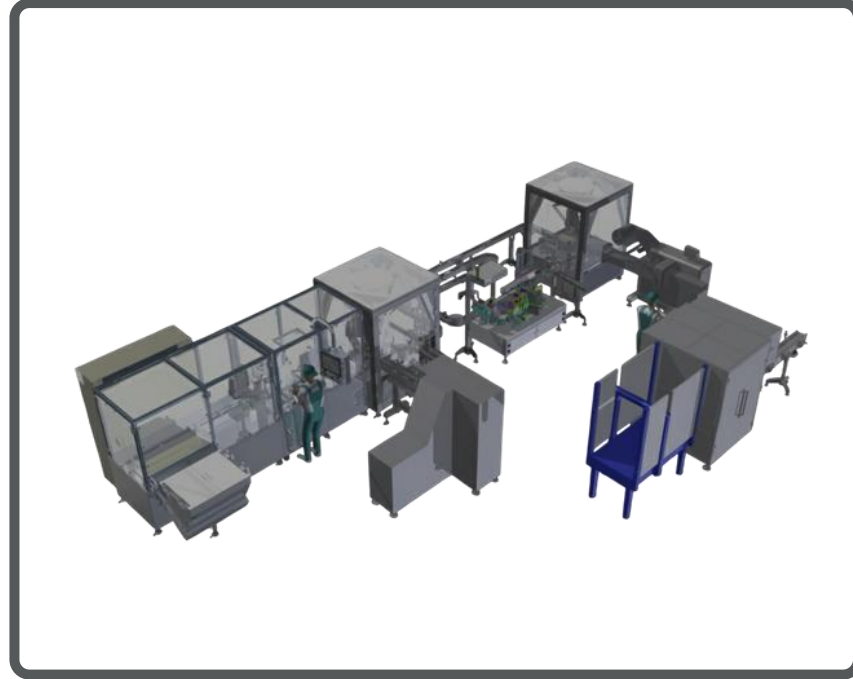

## *Key Benefits of Our Approach*

- **Streamlined Process**  
Seamless operations from start to finish
- **Quality Assurance**  
Consistent high standards maintained
- **Enhanced Productivity**  
Optimized efficiency throughout production
